PROFESSIONAL SUMMARY

Web and digital marketing professional who owns the full loop on a website: how it is structured, how the pages get built, what they say, and whether they worked. Five years across a multi-product enterprise WordPress site and a direct-to-consumer storefront built from scratch. Restructured a catalog that was competing against itself and rebuilt the product page template system in HTML, CSS, and JavaScript, lifting lead form submissions roughly 30%. Grew online sales 300% at a brand locked out of paid advertising, where site structure and organic search were the only growth channels available. Equally comfortable deciding site architecture, building the page, writing the copy, and reporting on what moved.

PROFESSIONAL EXPERIENCE

Digital Marketing Strategist | Southwest Solutions Group, Lewisville, TX

January 2025 – Present

- Own how a multi-product WordPress site is structured: what gets its own page, what consolidates, how navigation and internal linking work, and why. Several distinct product lines, each with its own audience, buying cycle, and search behavior
- Rebuilt the product page template system from the ground up in HTML, CSS, and JavaScript. The previous pages were walls of unstructured text on outdated layouts. Designed a reusable structure that makes dense technical information scannable, then rolled it across the full catalog
- Restructured the catalog after an audit found pages competing against each other for the same queries. Consolidated and retired overlapping pages, mapped redirects so traffic and equity carried over, and rebuilt the hierarchy so every page has a clear job
- Lead form submissions increased roughly 30% over the past year following these structural, template, and content changes
- Direct organic and answer engine presence: keyword and intent research in SEMrush and Search Console, schema and structured data, metadata and heading architecture, and content written to be cited rather than only ranked
- Interview vendors and subject matter experts to understand how products actually work and who buys them, then turn that into page content. Built the full digital presence for a new business division this way, across several iterations, for an audience that needed trust established first
- Built a custom interactive location map and state-level landing pages with localized proof, producing inbound inquiries from regions the company had no previous presence in, including Arizona, New Mexico, and Colorado
- Measure in GA4 and Google Search Console: landing page behavior, conversion paths, query and impression shifts, crawl and indexation health, Core Web Vitals. Changes are evaluated after they ship and the result decides what happens next
- Own the pre-launch review on everything that ships: responsive behavior across breakpoints, cross-device testing, link and redirect integrity, form and CRM handoff, metadata, and heading structure
- Use AI tooling daily for research, drafting, and automated page and case study workflows, then review and rewrite every output for accuracy, readability, and brand voice before it ships

Co-Founder & Operations Manager | SixRock Munitions, Weatherford, TX

January 2021 – December 2024

- Co-founded an ammunition manufacturing company and built its entire web presence on WordPress and WooCommerce, owning strategy, structure, build, and copy with no agency and no engineering team
- Grew online sales 300% over two years in a category restricted from Google and Meta advertising. With no paid channel available, site structure, product page quality, and organic search carried the whole growth burden

– Ran the storefront as a live retail operation: product and category setup, pricing and promotion scheduling, checkout and inventory integrations, seasonal landing pages, plugin and platform maintenance, and uptime
– Handled age-gating, compliance copy on product pages, and state-by-state shipping restrictions as structural constraints designed into the site rather than bolted on

Content Writer | BlackHawk Manufacturing Group, Fort Worth, TX

January 2023 – March 2024

– Wrote 20+ SEO-focused technical articles targeting real search demand, tracked performance in Google Analytics, and adjusted the editorial roadmap based on what actually ranked and converted

Co-Founder & Lead Web Developer | StrataLink, Fort Worth, TX

January 2020 – April 2022

– Co-founded a web development and marketing agency, owning information architecture, build, analytics setup, and ongoing optimization for clients across healthcare, home services, and professional services
– Ran discovery with non-technical business owners, turned what they knew into site structure and copy, and made the case for structural decisions in plain language

CORE COMPETENCIES

Web: Information Architecture & Navigation | Site Structure & Page Strategy | Page & Template System Design | Multi-Product Site Management | Landing Pages | Pre-Launch QA | Redirect & URL Strategy

Build: HTML | CSS | JavaScript | WordPress | WooCommerce | Elementor | Responsive Design | Cross-Device & Accessibility Testing | Core Web Vitals & Page Speed

Search & Content: Technical SEO | Answer Engine Optimization | Schema & Structured Data | Keyword Research & Search Intent | Cannibalization Audits & Content Consolidation | Product and Landing Page Copywriting

Ecommerce: DTC Storefront Ownership | Product & Category Setup | Merchandising | Promotional Campaigns | Conversion Optimization | Checkout & Inventory Integrations

Measurement: Google Analytics (GA4) | Google Search Console | Google Tag Manager | SEMrush | Ahrefs | HubSpot CRM | Post-Launch Performance Analysis

EDUCATION

North Central Texas College

Northwest High School | Diploma, 2018
